ABOUT US

The Expressive Child is an independent children's Speech and Language Therapy practice based in Walton-on-Thames. We work from our therapy centre, as well as at homes and in schools.

We work with you and your child to assess what they need, and provide intervention to address those needs, whether that's through direct therapy, training for people working with them, activities that you can do at home – or a combination of all three.

We work with children of all ages, from infants through to teens and young adults.

A 10% additional charge is added on where liaison with a large organisation, such as a local authority, is required

THE EXPRESSIVE CHILD

Speech and Language Therapy

AUTISM ASSESSMENTS

Our specialist team of speech & language therapists and clinical psychologists, using diagnostic tools such as the ADOS & ADI, are able to diagnose autism in children and young people, and provide adftercare support.

Considering a child's developmental history, alongside assessment through observation and play, our friendly team of speech & language therapists and clinical psychologists will work together to determine whether or not your child meets the criteria for an autism diagnosis. Once our team has discussed the assessments and compiled your child's report, you will be invited to meet with one of our team to be given the results, and where appropriate, an autism diagnosis for your child.

SCHOOL SUPPORT

We also partner with schools to provide their SLCN support

Direct therapy for individual children and small groups

Training for teachers, support staff and parents

Screening of year groups to identify needs

Reports for EHCP applications and assessments

Access to Therapy Plaza, our online liaison portal for staff and parents

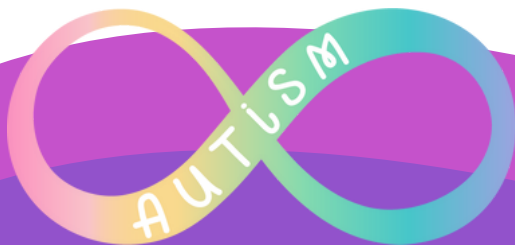

Contact us to discuss commissioning our service for your school
